21strict Attorney 21st Judicial District

On the afternoon of May 5, 2022, an envelope was delivered to the Office of the Livings Parish District Attorney's Office. Enclosed was a letter from you, Catherine Moran, 19120 Aydel French Settlement, 1a, 20733, challenging the appointment of Jeremy, Rayn Aydell as an After Village of French Settlement. Attached with your letter was a map and a proclamation of the incorporation of the Avillage of Exercise Center.

Upon receipt of your letter, our office contacted Mr. Aydell to let him know we had received the challenge and would be conducting an investigation. On May 6, 2022, our office left a message for you to let you know that we had received your complaint and that we would begin looking into it. We indicated that we would contact you if we had additional questions. On May 9, 2022, our office went to the Livingston Parish Office of the Registrar of Voters and inquired as to your status as an elector because the statute regarding challenges requires that the person challenging the residency of an elected official must be an elector. Registrar of Voters, Jared Andrews confirmed that you are currently an elector and have been registered to vote at your current.

On May 16, 2022, our office went to the Livingston Parish Assessor's Office and spoke with Chief Deputy Assessor Tim McMasters. An inquiry was made as to what their records showed to be Jeremy Aydell's registered address and if his property was within the boundary of French Settlement. We were provided documentation which showed that Jeremy Aydell's address, where he claims a homestead exemption, is listed as 17141 Simon Lane, French Settlement, Louisiana. It indicates that Mr. Jeremy Aydell resides on 3.66 acres. Our office was shown a map which indicates that the Village of French Settlement boundary bisects Mr. Aydell's property. Therefore, he is currently assessed as being in the Village of French Settlement and has been assessed as being a resident since 2019. We were provided a letter that the Assessor's Office posits that if any part of the property is in the city limits, it constitutes the whole property being in the city limits.

Our office then went to the Livingston Registrar of Voters Office and met with Registrar of Voters, Jared Andrews. An inquiry was made as to whether Jeremy Aydell had been voting in the Village of French Settlement elections and we were informed that he had participated in elections in that jurisdiction since October 12, 2019. We were provided with a certified copy of his registration and a certified copy of his voting record in the Town's elections. Mr. Andrews provided me with a

determination that Jeremy Aydell is a qualified elector for the Village of French Settlement at the address of 17141 Simon Lane.

This office reviewed Louisiana Revised Statues in Title 18 and Title 33 as well as Attorney General Opinions 17-0095 and 12-0097 which deal with the qualifications and residency requiremen office holders in a Lawrason Act mulcipality. We also reviewed Louisiana jurisprudence which broa interprets an office holder's qualifications in residency challenges to the benefit of the office holder.

In making a final determination of whether Mr. Aydell currently meets the qualifications to he the office of Alderman for the Town of French Settlement, we agree with the Livingston Assessor and the Livingston Registrar of Voters. Public and official records reveal that Mr. Aydell has resided at his residence since 2019 and voted in town elections since that date. He has continued to reside at the same residence since that date. He resides on property that currently bisects the boundary of the Village of French Settlement. Both the Livingston Assessor's Office and Alderman learn meets the mailifications to eye as an Alderman for the Village of French Wellfall practed the Village of French Well practed the Village of French Wellfall practed the Village of

We are pleased to present to you the Annual Water Quality Report for the year 2021. This report is designed to inform you about the quality of your water and services we deliver to you every day (1ste informer continee information muy importante sobre su again patible. Tradizzion to nable on alguien que lo entienda bien). Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. water. Our water source(s) are listed below:

SOURCE NAME
WELL #1 ALBANY TOWN HALL
WELL #3 - DAN PIERSON
WELL #2 TOWN OF ALBANY - COKER VAIL The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick you substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

<u>Inorganic Contaminants</u> - such as salts and metals, which can be naturally-occurring or result from urban storr domestic wastewater discharges, oil and gas production, mining, or farming.

<u>Organic Chemical Contaminants</u> – including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.

A Source Water Assessment Plan (SWAP) is now available from our office. This plan is an assessment of a delineated area around our listed sources through which contaminants, if present, could migrate and reach our source water. It also includes an inventory of potential sources for contamination within the delineated area, and a determination of the water supply's susceptibility or contamination by the identified potential sources. According to the Source Water Assessment Plan, o water system had a susceptibility rating of 'MEDIUM'. If you would like to review the Source Water Assessment Plan, please feel free to contact our office.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration regulations establish limits for contaminants in bottled water which must provide the same protection for public health. We want our valued customers to be informed about their water utility. If you have any questions about this report, want to attend any scheduled meetings, or simply want to learn more about your drinking water, please contact EILEEN MCCARROL at 225 567-1101.

If present, elevated levels of lead can cause serious health problems, especially for prepanat women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. TOWN OF ALBANY WATER SYSTEM is responsible fo providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 27 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure available from the Safe Drinking Water Hotline or at <a href="http://www.epa.gov/safewater/lead">http://www.epa.gov/safewater/lead</a>.

The Louisiana Department of Health routinely monitors for constituents in your drinking water according to Federal and State laws. The tables that follow show the results of our monitoring during the period of January 1st to December 31st, 2021. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. In the tables below, you will find many terms and abbreviations you might not be familiar with To help you better understand these terms, we've provided the following definitions:

Parts per million (ppm) or Milligrams per liter (mg/L) — one part per million corresponds to one minute in two years or a single penny in

Maximum contaminant level gool (MCLOS) - the "Good" is the level of a contaminant in drinking water below whe expected risk to human health. MCLOS allow for a margin of safety.

Maximum residual disinfectant level (MBDL) - The highest level of a disinfectant allowed in drinking water. The addition of a disinfectant to necessary for control of microbial contaminants. Maximum residual disinfectant level goal (MRDLG) — The level of a drinking water disinfectant below which the to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Analyte No Violations Occurred in the Calendar Year of 2021

Our water system tested a minimum of 7 samples per month in accordance with the Total Coliform Rule for microbiological contaminants. With the microbiological samples collected, the water system collects disinfectant residuals to ensure control of microbial growth.

In the tables below, we have shown the regulated contaminants that were detected. Chemical Sampling of our drinking water may not be required on an annuab asis; therefore, information provided in this table refers back to the latest year of chemical sampling results. To determine compliance with the remaining drinking water standards, the treated water is monitored when a contaminant is elevated in the source water.

Some people may be more vulnerable to contaminants in drinking water than the general population.
Immuno-compromised persons such as persons with cancer undergoine demotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers.
