Season 4 of 'For All Mankind' enters new millennium

Whether it takes "one small step" or "one giant leap" to get to your couch, do it "For All Mankind." The hit Apple TV+ television series "For All Mankind" is back for a fourth season Friday, Nov. 10, after taking a year-and-a-halflong hiatus. With one Primetime Emmy win under its belt already, the sci-fi drama's newest season is comprised of another 10 episodes, thus bringing the total episode count for the series to a whopping 40.

The series first made (gravitational?) waves when it premiered on its home streamer in 2019. Marketed as an alternate version of 1969, in which "the Soviet Union beats the United States to the moon" (per IMDb), the series reimagines history and speculates how this one change in events could have sparked a whole new world order. Largely focused on the political and scientific ramifications of the then-U.S.S.R. making history on the moon, "For All Mankind" Season 1 leaned into the idea of a space race that "continues on for decades with still grander challenges and goals."

With the premiere of Season 2 in February 2021, the astronauts faced an all-new set of challenges that took place more than a decade after the moon landing. Having confronted everything from lunar ice and trespassers to gender debates in Season 1, the next two seasons promised higher stakes and bigger problems. And on this promise it surely delivered.

From natural disasters such as solar storms and generally harsh living conditions to personal qualms ranging from reckless and selfish behavior to ego-based contests and grand political motivations, there has never been a dull moment on the screen — or in the lives of "For All Mankind's" fictionalized astronauts and their families.

One of these astronauts is Edward Baldwin, played by "The Killing's" Joel Kinnaman. The head of the Baldwin family, which has seen some serious struggles throughout the show's three seasons to date, Ed is one of NASA's best astronauts and is rumored to have been based upon real-life Apollo 10 commander Thomas P. Stafford. While Ed has been supported by several family members over the years, including Karen (Shantel VanSanten, "Shooter"), Kelly (Cynthy Wu, "Holidate," 2020) and Shane (played by brothers Teddy and Tait Blum, "Big Little Lies" and "Shooter," respectively), the only confirmed Baldwin returning (other than Ed) is Kelly.

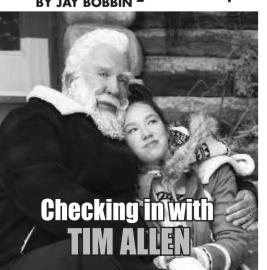

Joining Ed in space and on Earth are returning characters Ellen Wilson (Jodi Balfour, "Quarry"), Margo Madison (Wrenn Schmidt, "Nope," 2022), Danielle Poole (Krys Marshall, "Supergirl"), Helios Aerospace founder Dev Ayesa (Edi Gathegi, "The Blacklist") and Aleida Rosales (Coral Peña, "The Post," 2017).

Viewers who are already familiar with "For All Mankind" and who may be wondering what is to come in the newest season need look no further than the official trailer, as issued by Apple TV+ in mid-September. Time flies in "For All Mankind," and in a move that echoes the near-decade jump from Season 2 into Season 3 in June 2022, the fourth season of the series picks up eight years after the Season 3 finale.

"Rocketing into the new millennium in the eight years since Season 3," reads an Apple TV+ news release from Sept. 13, "Happy Valley has rapidly expanded its footprint on Mars by turning former foes into partners. Now 2003, the focus of the space program has turned to the capture and mining of extremely valuable, mineral-rich asteroids that could change the future of both Earth and Mars."

But Apple is quick to remind viewers of the darkness lurking in space as "simmering tensions between the residents of the now-sprawling international base threaten to undo everything they are working towards."

For Tim Allen, "The Santa Clause" is a gift that keeps on giving.

Though he's had long-running television sitcoms with "Home Improvement" and "Last Man Standing," the actor-comedian has had mixed fortunes in the movie realm. One of his most successful films was the 1994 Disney comedy about an everyday man pressed into service as the new Father Christmas, with Allen reprising the role in 2002 and 2006 theatrical sequels. He's playing it again in "The Santa Clauses," a Disney+ series that had its premiere last holiday season and returns for a second round with the first two new episodes Wednesday, Nov. 8.

The show's return finds Scott Calvin (Allen), who has been performing the tasks of Santa since being transformed into the beloved yuletide figure, still considering retirement and seeking a successor to accomplish Christmas Eve gift deliveries. Elizabeth Mitchell, Austin Kane, Elizabeth Allen-Dick (Allen's daughter) and Laura San Giacomo also return in their roles, with Eric Stonestreet ("Modern Family") and Gabriel Iglesias among those joining the show for its sophomore season.

While he has made such other movies as "Galaxy Quest" and "Joe Somebody," Allen has scored many of his top big-screen victories via Disney. The Toy Story franchise surely stands as testament to that, with his voicing of Buzz Lightyear helping to fuel four massively profitable feature films as well as related short subjects and television specials. "Jungle 2 Jungle" and a remake of "The Shaggy Dog" are among other projects that have served both Allen and the Disney studio well.

Whether "The Santa Clauses" will keep the humor and magic going for a third season remains to be seen, but at least for now, Disney+ is putting Allen back in an iconic outfit and a familiar premise at the time of year that suits them best.
